Step 3 - We also have variable borders to match Semantic's styling (border tops vs border bottoms).

Select the base layer, it's the bottom layer. Change the radius for whatever radius the same way we did for the Base symbol.

Don't forget to respect Sketch's multi-corner radius format: 5;5;0;0 = top only.

Maybe it means something more - something we can't yet understand. Maybe it's some evidence, some artifact of a higher dimension that we can't consciously perceive. I'm drawn across the universe to someone I haven't seen in a decade, who I know is probably dead. Love is the one thing we're capable of perceiving that transcends dimensions of time and space.

In case you wish to change the colour of your Selected/Active Items (Check example) you can quickly do that as well. I created a separate Text Style called Custom and linked it to those layers in Styleguides.

PS: Even, if your company colour is Red or Green I wouldn't suggest using it for those situations, it might cause a bit confusion for the user.
