Step 3 - We also have variable borders to match Semantic's styling (border tops vs border bottoms).

Select the base layer, it's the bottom layer. Change the radius for whatever radius the same way we did for the Base symbol.

Don't forget to respect Sketch's multi-corner radius format: 5;5;0;0 = top only.

Font choices as flexible as your imagination

STEEP

In case you wish to change the colour of your Selected/Active Items (Check example) you can quickly do that as well. I created a separate Text Style called Custom and linked it to those layers in Styleguides.

PS: Even, if your company colour is Red or Green I wouldn't suggest using it for those situations, it might cause a bit confusion for the user.

SELEGT

Searchhnuage...
The image shows the text "Searchhnuage..." in a stylized, pixelated font. The letters are dark gray with a lighter gray outline, giving them a 3D or embossed appearance. The text is set against a light gray background with a subtle, repeating pattern of small, light gray squares. The font is a mix of uppercase and lowercase letters, with some characters appearing slightly larger or more prominent than others. The overall aesthetic is reminiscent of early digital art or a retro video game title screen.
